Highly analytical and results-driven final-year Computer Science student with a strong foundation in machine learning, data analysis, and programming (Python, SQL). Eager to apply expertise in translating complex data into actionable insights to inform product decisions and analyze user behavior in an entry-level Data Scientist role at Meta.

EDUCATION

Osmania University, Hyderabad, India
Bachelor of Engineering in Computer Science

Nov 2021 - May 2025

WORK EXPERIENCE

Data Science Intern, Solix Technologies

May 2024 - July 2024

- Developed a hybrid CNN+BiLSTM architecture for accurate handwritten text recognition, achieving high accuracy in classifying handwritten and digital content.
- Built a user-friendly Streamlit web application for real-time document processing, enabling automated extraction and classification of unstructured documents (cheques, receipts).
- Managed data preprocessing, model training, testing, and debugging to ensure system reliability.

Research and Development Intern, Tejas Networks

Jan 2025 - Present

- Developed and automated comprehensive test suites in Python for advanced switching features (802.1ad, ACL, STP), ensuring protocol compliance and system stability.
- Identified critical defects through debugging, regression, and stress testing, significantly improving feature reliability.
- Optimized end-to-end testing by automating workflows and refining test logic, increasing coverage and speed.

ACADEMIC PROJECTS

Social media account legit check | Python, TensorFlow, ANN, Pandas

- Built a machine learning model to identify fake social media accounts with high accuracy by analyzing username credentials.

X-rays detection model | Python, TensorFlow, Neural Networks, CNNs, Streamlit

- Developed a convolutional neural network (CNN) model (integrated with VGG16 and ResNet architectures) achieving over 90
- Created a user-friendly interface for easy interaction with the model's results.

TECHNICAL SKILLS

- Languages:** Python, Java, SQL (MySQL, PostgreSQL), JavaScript, HTML, CSS
- Libraries:** TensorFlow, Keras, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- Tools:** Git, Google Cloud Platform, VS Code, Jupyter Notebook
- Machine Learning:** Classification, Regression, CNN, ANN, LSTM, Computer Vision

ACHIEVEMENTS

- Secured a full merit-based scholarship for outstanding academic excellence.
- Consistently ranked among the top 3
