(+91) 9701597895 · rahulasam007@gmail.com · linkedin.com/in/asam-rahul · [github/Rahulyzk-007](https://github.com/Rahulyzk-007)

Passionate and analytical final-year Computer Science student with a strong foundation in machine learning, data analysis, and algorithmic problem-solving, eager to apply skills as an Entry Level Data Scientist at Meta. Proven ability to leverage Python and SQL for building data-driven solutions, analyzing user behavior, and developing robust models, as demonstrated through internship and academic projects. Possesses a problem-solving mindset and effective communication skills, ready to contribute to impactful product decisions.

EDUCATION

Osmania University, Hyderabad, India
Bachelor of Engineering in Computer Science

Nov 2021 - May 2025

WORK EXPERIENCE

Data Science Intern, Solix Technologies

May 2024 - July 2024

- Developed a hybrid CNN+BiLSTM architecture for handwritten text recognition.
- Built a document preprocessing pipeline for segmenting unstructured documents.
- Created a Streamlit web app for real-time document processing.

Research and Development Intern, Tejas Networks

Jan 2025 - Present

- Developed and automated comprehensive test suites using Python for advanced switching features (802.1ad, ACL, STP).
- Identified critical defects via debugging, regression, and stress testing.
- Optimized end-to-end testing by automating workflows and refining test logic.

ACADEMIC PROJECTS

X-rays detection model | *Python, TensorFlow, Neural Networks, CNNs, Streamlit*

- Built an X-ray detection model using CNNs (VGG16, ResNet) with over 90
- Provided a user interface for easy interaction with results.

Deep GAN Features for Face Sketch Synthesis | *Python, TensorFlow, GANs, Image Processing, Streamlit*

- Designed a UNet generator and PatchGAN discriminator architecture.
- Enhanced the model with attention and residual blocks.

Social media account legit check | *Python, TensorFlow, ANN, Pandas*

- Built a machine learning model to identify fake social media accounts.

ConnectFy: Reliable Offline Chat for All | *Android Studio, Java/Kotlin, Bluetooth, Wi-Fi Direct, Mesh Networking, UI/UX*

- Developed a robust app for peer-to-peer chat without internet connectivity.
- Built a user-friendly UI with features like adaptive connectivity and low-latency communication.

2048 - Web development game | *HTML, CSS, JS, MySQL*

- Developed a web application for the 2048 game.
- Integrated a database to track user scores.

TECHNICAL SKILLS

- **Languages:** Python, Java, C/C++, SQL (MySQL, PostgreSQL), JavaScript, HTML, CSS, C#
- **Developer Tools:** Git, Google Cloud Platform, VS Code, Linux Commands, PyCharm, Eclipse, Jupyter
- **Machine Learning:** Classification, Regression, CNN, ANN, RNN, GAN, LSTM, Computer Vision
- **Libraries:** TensorFlow, Keras, Pandas, NumPy, NLTK, Scikit-learn, Matplotlib, Seaborn, Pillow

ACHIEVEMENTS

- Secured a full merit-based scholarship.
- Consistently ranked among the top 3
