A highly analytical and results-driven final-year Computer Science student with a strong foundation in machine learning, data analysis, and Python/SQL, seeking an entry-level Data Scientist position at Meta. Proven ability to translate complex data into actionable insights, evidenced by developing predictive models, automating data processing pipelines, and building user-friendly applications to drive product decisions and solve real-world problems.

EDUCATION

Osmania University, Hyderabad, India

Bachelor of Engineering in Computer Science

Nov 2021 - May 2025

WORK EXPERIENCE

Data Science Intern, Solix Technologies

May 2024 - July 2024

- Developed a hybrid CNN+BiLSTM architecture for accurate handwritten text recognition, achieving high accuracy in classifying handwritten and digital content.
- Built a user-friendly Streamlit web application for real-time document processing, enabling automated extraction and classification of unstructured documents (cheques, receipts).
- Managed data preprocessing, model training, testing, and debugging to ensure system reliability.

Research and Development Intern, Tejas Networks

Jan 2025 - Present

- Developed and automated comprehensive test suites in Python for advanced switching features (802.1ad, ACL, STP), ensuring protocol compliance and system stability.
- Identified critical defects through debugging, regression, and stress testing, significantly improving feature reliability.
- Optimized end-to-end testing by automating workflows and refining test logic, increasing coverage and speed.

ACADEMIC PROJECTS

Social media account legit check | *Python, TensorFlow, ANN, Pandas*

- Built a machine learning model to identify fake social media accounts with high accuracy by analyzing username credentials.

X-rays detection model | *Python, TensorFlow, Neural Networks, CNNs, Streamlit*

- Developed a convolutional neural network (CNN) model (integrated with VGG16 and ResNet architectures) achieving over 90
- Created a user-friendly interface for easy interaction with the model's results.

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL (MySQL, PostgreSQL), JavaScript, HTML, CSS
- **Libraries:** TensorFlow, Keras, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Tools:** Git, Google Cloud Platform, VS Code, Jupyter Notebook
- **Machine Learning:** Classification, Regression, CNN, ANN, LSTM, Computer Vision

ACHIEVEMENTS

- Secured a full merit-based scholarship for outstanding academic excellence.
- Consistently ranked among the top 3
